

Children, 15 to 24 years, Females, Indigenous population profile, Census of population, 2016

		Nunavik, Quebec [Inuit region]								
		Female								
		15 to 24 years								
Note	Total Aboriginal identity [1]	Aboriginal identity [2]	Single Aboriginal responses [3]	First Nations [4]	Métis	Inuk (Inuit)	Multiple Aboriginal responses [5]	Aboriginal responses not included elsewhere [6]	Non- Aboriginal identity	
Characteristics										
Average age and median age	Total - Average age and median age for the population in private households - 25% sample data	1270	1245	1250	15	0	1235	0	0	25
	Average age
	Median age
Marital status	Total - Marital status for the population aged 15 years and over in private households - 25% sample data	1275	1250	1250	15	10	1230	0	0	20
	Married or living common law	265	255	255	10	0	250	0	0	10
	Married	20	15	20	0	0	15	0	0	0
	Living common law	245	240	240	10	0	235	0	0	10
	Not married and not living common law	1005	995	990	10	10	985	0	0	15
	Never married	1000	990	990	10	10	980	0	0	15
	Separated	0	0	0	0	0	0	0	0	0
	Divorced	0	0	0	0	0	0	0	0	0
	Widowed	0	0	0	0	0	0	0	0	0
Family characteristics	Total - Family characteristics for the population in private households - 25% sample data	1270	1250	1250	15	10	1230	0	0	25
	Married spouses and common-law partners	260	255	255	0	0	245	0	0	10
	Married spouses	15	15	15	0	0	15	0	0	0
	Common-law partners	250	240	240	10	0	230	0	0	10
	Lone parents (in lone-parent census families)	145	150	145	0	0	145	0	0	0
	Children in census families (as in sons, daughters or grandchildren)	720	715	715	0	0	705	0	0	10
	Living with two biological or adoptive parents	375	365	365	0	0	360	0	0	10
	In an intact family	360	355	355	0	0	350	0	0	10
	In a complex stepfamily	10	10	15	0	0	10	0	0	0
	Living with one biological or adoptive parent and one step-parent	50	55	50	0	0	50	0	0	0
	In a simple stepfamily	15	15	20	0	0	15	0	0	0
	In a complex stepfamily	40	40	40	10	0	35	0	0	0
	Living with one parent in a lone-parent census family	265	265	270	0	0	265	0	0	0
	With a male lone parent	65	60	60	0	0	60	0	0	0
	With a female lone parent	205	205	205	0	0	205	0	0	0
	Living with grandparents without parents present	25	30	30	0	0	25	0	0	0
	With two grandparents without parents present	15	15	20	0	0	20	0	0	0
	With one grandparent without parents present	10	15	10	0	0	10	0	0	0
	Persons not in census families	135	130	135	0	0	130	0	0	10
	Living with other relatives	90	90	90	0	0	85	0	0	0
	Foster children	25	25	20	0	0	25	0	0	0
	Living with non-relatives only or alone	30	20	20	0	0	20	0	0	10
Registered or Treaty Indian status	Total - Population by Registered or Treaty Indian status for the population in private households - 25% sample data	1270	1250	1250	15	10	1235	0	0	20
	Registered or Treaty Indian	20	15	15	15	0	0	0	0	0

Notes:

[1] Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements in the 2016 Census of Population. For more information on Aboriginal variables including information on their classifications the questions from which they are derived data quality and their comparability with other sources of data refer to the Aboriginal Peoples Reference Guide Census of Population 2016 and the Aboriginal Peoples Technical Report Census of Population 2016.

[2] 'Aboriginal identity' includes persons who are First Nations (North American Indian) Métis or Inuk (Inuit) and/or those who are Registered or Treaty Indians (that is registered under the Indian Act of Canada) and/or those who have membership in a First Nation or Indian band. Aboriginal peoples of Canada are defined in the Constitution Act 1982 section 35 (2) as including the Indian Inuit and Métis peoples of Canada.

[3] 'Single Aboriginal responses' includes persons who are in only one Aboriginal group that is First Nations (North American Indian) Métis or Inuk (Inuit).

[4] Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements in the 2016 Census of Population. For additional information refer to the Aboriginal Peoples Reference Guide Census of Population 2016.

[5] 'Multiple Aboriginal responses' includes persons who are any two or all three of the following: First Nations (North American Indian) Métis or Inuk (Inuit).

[6] 'Aboriginal responses not included elsewhere' includes persons who are not First Nations (North American Indian) Métis or Inuk (Inuit) but who have Registered or Treaty Indian status and/or Membership in a First Nation or Indian band.

[7] For more information refer to the Census Dictionary: Marital status.

[8] For more information refer to the Census Dictionary: Census family

[9] One or more grandparents of the child may also be present in the household.

[10] In an intact family all children are the biological or adopted children of both persons in the couple. This category also includes children living in census families for whom it cannot be determined whether it is an intact family or a stepfamily.

[11] In a complex stepfamily some or all of the children are step-siblings or half-siblings.

[12] In a simple stepfamily none of the children are step-siblings or half-siblings.

[13] In a complex stepfamily some or all of the children are step-siblings or half-siblings.

[14] One or more grandparents of the child may also be present in the household.

[15] Registered or Treaty Indian status refers to whether or not a person is a Registered or Treaty Indian. Registered Indians are persons who are registered under the Indian Act of Canada. Treaty Indians are persons who belong to a First Nation or Indian band that signed a treaty with the Crown. Registered or Treaty Indians are sometimes also called Status Indians.

Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements in the Census of Population. For more information on Aboriginal variables including information on their classifications the questions from which they are derived data quality and their comparability with other sources of data please refer to the Aboriginal Peoples Reference Guide Census of Population 2016 and the Aboriginal Peoples Technical Report Census of Population 2016.

[16] Registered or Treaty Indian Status' includes persons who are a Registered or Treaty Indian. Registered Indians are persons who are registered under the Indian Act of Canada. Treaty Indians are persons who belong to a First Nation or Indian band that signed a treaty with the Crown. Registered or Treaty Indians are sometimes also called Status Indians.

[17] Aboriginal ancestry refers to whether a person has ancestry associated with the Aboriginal peoples of Canada that is First Nations (North American Indian) Métis and Inuit. Aboriginal peoples of Canada are defined in the Constitution Act 1982 section 35 (2) as including the Indian Inuit and Métis peoples of Canada. Ancestry refers to the ethnic or cultural origins of the person's ancestors an ancestor being usually more distant than a grandparent. A person can have more than one ethnic or cultural origin.

Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements in the Census of Population.

For more information on Aboriginal variables including information on their classifications the questions from which they are derived data quality and their comparability with other sources of data refer to the Aboriginal Peoples Reference Guide Census of Population 2016 and the Aboriginal Peoples Technical Report Census of Population 2016.

[18] 'Aboriginal ancestry (only)' includes persons who have First Nations (North American Indian) Métis and/or Inuit ancestry. It excludes persons with non-Aboriginal ancestry.

[19] 'Single Aboriginal ancestry (only)' includes persons who have only one of First Nations (North American Indian) Métis or Inuit ancestry. It excludes persons with non-Aboriginal ancestry.

[20] Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements in the Census of Population. For additional information refer to the Aboriginal Peoples Reference Guide Census of Population 2016.

[21] 'Multiple Aboriginal ancestries (only)' includes persons who have two or more of First Nations (North American Indian) Métis and Inuit ancestries. It excludes persons with non-Aboriginal ancestry.

[22] 'Aboriginal and non-Aboriginal ancestries' includes persons who have First Nations (North American Indian) Métis and/or Inuit ancestry as well as non-Aboriginal ancestry.

[23] 'Single Aboriginal and non-Aboriginal ancestries' includes persons who have First Nations (North American Indian) Métis or Inuit ancestry as well as non-Aboriginal ancestry.

[24] 'Multiple Aboriginal and non-Aboriginal ancestries' includes persons who have two or more of First Nations (North American Indian) Métis and Inuit ancestries as well as non-Aboriginal ancestry.

[25] 'Non-Aboriginal ancestry (only)' includes persons who have non-Aboriginal ancestry only.

[26] This is a total population estimate. The sum of the ancestries in this table is greater than the total population estimate because a person may report more than one ancestry in the census. For more information on Aboriginal variables including information on their classifications the questions from which they are derived data quality and their comparability with other sources of data refer to the Aboriginal Peoples Reference Guide Census of Population 2016 and the Aboriginal Peoples Technical Report Census of Population 2016. For additional information on the collection and dissemination of ethnic origin data refer to the Ethnic Origin Reference Guide Census of Population 2016.

[27] In the Census of Population some respondents may choose to provide very specific Aboriginal ancestries while other respondents may choose to give more general responses. This means that two respondents with the same ancestry could have different response patterns and thus could be counted as having different Aboriginal ancestries. For example one respondent may report 'First Nations' ethnic origin while another respondent with a similar ancestral background may report 'Ojibway' or 'Anishinaabe' ancestry

[28] Includes general responses indicating Anishinaabe ancestry (e.g. 'Anishinaabe') as well as more specific responses indicating Anishinaabe ancestry (e.g. 'Nipissing').

[29] Includes general responses indicating Blackfoot ancestry (e.g. 'Blackfoot') as well as more specific responses indicating Blackfoot ancestry (e.g. 'Siksika' 'Piikani').

[30] Includes general responses indicating Dene ancestry (e.g. 'Dene').

[31] Includes general responses indicating Iroquois ancestry (e.g. 'Iroquois' 'Haudenosaunee') as well as more specific responses indicating Iroquois origins (e.g. 'Seneca' 'Onondaga' 'Tuscarora').

[32] Includes general responses indicating Salish ancestry (e.g. 'Salish') as well as more specific responses indicating Salish ancestry (e.g. 'Coast Salish' 'Interior Salish' 'K'omoks' 'Saanich').

[33] Includes general responses indicating Sioux ancestry (e.g. 'Sioux').

[34] Includes general responses indicating Tutchone ancestry (e.g. 'Tutchone') as well as more specific responses indicating Tutchone ancestry (e.g. 'Northern Tutchone' 'Southern Tutchone').

[35] Includes general responses indicating First Nations ancestry (e.g. 'First Nations' 'North American Indian') as well as more specific responses indicating First Nations ancestry that have not been included elsewhere (e.g. 'Passamaquoddy' 'Crow' 'Cheyenne' 'Athabaskan').

[36] Knowledge of official languages refers to whether the person can conduct a conversation in English only French only in both languages or in neither language. For a child who has not yet learned to speak this includes languages that the child is learning to speak at home.

For more information on language variables including information on their classifications the questions from which they are derived data quality and their comparability with other sources of data please refer to the Languages Reference Guide Census of Population 2016.

[37] First official language spoken is specified within the framework of the Official Languages Act. It refers to the first official language (i.e. English or French) spoken by the person.

For more information on language variables including information on their classifications the questions from which they are derived data quality and their comparability with other sources of data please refer to the Languages Reference Guide Census of Population 2016.

[38] The official language minority population of Quebec includes all individuals with English as a first official language spoken and half of those with both English and French. The official language minority population of the country overall and of every province and territory other than Quebec includes individuals with French as a first official language spoken and half of those with both English and French.

[39] The official language minority population of Quebec includes all individuals with English as a first official language spoken and half of those with both English and French. The official language minority population of the country overall and of every province and territory other than Quebec includes individuals with French as a first official language spoken and half of those with both English and French.

[40] This is a total population count. The sum of the languages in this table is greater than the total population count because a person may report more than one language in the census.

n.i.e. = not included elsewhere

n.o.s. = not otherwise specified

[41] This is a total population count. The sum of the languages in this table is greater than the total population count because a person may report more than one language in the census.

n.i.e. = not included elsewhere

n.o.s. = not otherwise specified

[42] 'Knowledge of official languages' refers to whether the person can conduct a conversation in English only French only in both or in neither language. For a child who has not yet learned to speak this includes languages that the child is learning to speak at home.

'Knowledge of non-official languages' refers to whether the person can conduct a conversation in a language other than English or French. For a child who has not yet learned to speak this includes languages that the child is learning to speak at home. The number of languages that can be reported may vary between surveys depending on the objectives of the survey.

For more information on language variables including information on their classifications the questions from which they are derived data quality and their comparability with other sources of data please refer to the Languages Reference Guide Census of Population 2016.

This is a total population count. The sum of the languages in this table is greater than the total population count because a person may report more than one language in the census.

n.i.e. = not included elsewhere

n.o.s. = not otherwise specified

[43] Refers to the status of a person with regard to the place of residence on the reference day May 10 2016 in relation to the place of residence on the same date one year earlier at the provincial level. Persons who have not moved are referred to as non-movers and persons who have moved from one residence to another are referred to as movers. Movers include non-migrants and migrants. Non-migrants are persons who did move but remained in the same city town township village or Indian reserve. Migrants include internal migrants who moved to a different city town township village or Indian reserve within Canada. External migrants include persons who lived outside Canada at the earlier reference date.

[44] Refers to the status of a person with regard to the place of residence on the reference day May 10 2016 in relation to the place of residence on the same date five years earlier at the provincial level. Persons who have not moved are referred to as non-movers and persons who have moved from one residence to another are referred to as movers. Movers include non-migrants and migrants. Non-migrants are persons who did move but remained in the same city town township village or Indian reserve. Migrants include internal migrants who moved to a different city town township village or Indian reserve within Canada. External migrants include persons who lived outside Canada at the earlier reference date.

[45] Users are advised to consult data quality comments for 'Secondary (high) school diploma or equivalency certificate' available in the Education Reference Guide Census of Population 2016 Catalogue no. 98-500-X2016013.

[46] Here 'postsecondary certificate or diploma' includes the categories 'apprenticeship or trades certificate or diploma' and 'college CEGEP or other non-university certificate or diploma.'

[47] 'Postsecondary certificate diploma or degree' includes 'apprenticeship or trades certificate or diploma' 'college CEGEP or other non-university certificate or diploma' and university certificates diplomas and degrees.

[48] Users are advised to consult data quality comments for 'Highest certificate diploma or degree' available in the Education Reference Guide Census of Population 2016 Catalogue no. 98-500-X2016013.

[49] 'Secondary (high) school diploma or equivalency certificate' includes only people who have this as their highest educational qualification. It excludes persons with a postsecondary certificate diploma or degree.

[50] 'Trades certificate or diploma other than Certificate of Apprenticeship or Certificate of Qualification' includes trades certificates or diplomas such as pre-employment or vocational certificates and diplomas from brief trade programs completed at community colleges institutes of technology vocational centres and similar institutions.

[51] 'Certificate of Apprenticeship or Certificate of Qualification' also includes Journeyperson's designations.

[52] 'University certificate diploma or degree above bachelor level' includes the categories 'University certificate or diploma above bachelor level' 'Degree in medicine dentistry veterinary medicine or optometry' 'Master's degree' and 'Earned doctorate.'

[53] 'Field of study' refers to the discipline or area of learning/training associated with a particular course or programme of study.

This variable refers to the predominant discipline or area of learning or training of a person's highest completed postsecondary certificate diploma or degree classified according to the Classification of Instructional Programs (CIP) Canada 2016.

This 'Major field of study' variable can be used either independently or in conjunction with the 'Highest certificate diploma or degree' variable. When the latter is used with 'Major field of study' it should be noted that different fields of study will be more common for different types of postsecondary qualifications. At the detailed program level some programs are only offered by certain types of institutions.

There was an explicit instruction in the questionnaire which instructed respondents to be as specific as possible in indicating a subfield or subcategory of specialization within a broad discipline or area of training.

This variable is reported for persons aged 15 years and over in private households.

This variable shows the 'Variant of CIP 2016 - Alternative primary groupings' CIP variant with the hierarchy of the primary groupings and two-digit series. When a primary grouping contains more than one subseries from series '30. Multidisciplinary/interdisciplinary studies' these subseries are grouped together. An exception is made for '30.01 Biological and physical sciences' due to its large size. For more information on the CIP classification see the Classification of Instructional Programs Canada 2016: <http://www.statcan.gc.ca/eng/concepts/classification>.

For information on collection classification and data quality for this variable refer to the Education Reference Guide Census of Population 2016 Catalogue no. 98-500-X2016013.

Certain series and their subcomponents are not used when coding major field of study for the census. These are series 21 32 to 37 and 53 which represent non-credit and personal improvement fields of study.

[54] 'No postsecondary certificate diploma or degree' includes persons who have not completed an apprenticeship or trades certificate or diploma

[55] 'Interdisciplinary humanities' includes '30.13 Medieval and renaissance studies' '30.21 Holocaust and related studies' '30.22 Classical and ancient studies' and '30.29 Maritime studies.'

[56] 'Interdisciplinary social and behavioural sciences' includes '30.05 Peace studies and conflict resolution' '30.10 Biopsychology' '30.11 Gerontology' '30.14 Museology/museum studies' '30.15 Science technology and society' '30.17 Behavioural sciences' '30.20 International/global studies' '30.23 Intercultural/multicultural and diversity studies' '30.25 Cognitive science' '30.26 Cultural studies/critical theory and analysis' '30.28 Dispute resolution' '30.31 Human computer interaction' and '30.33 Sustainability studies.'

[57] 'Other interdisciplinary physical and life sciences' includes '30.18 Natural sciences' '30.19 Nutrition sciences' '30.27 Human biology' and '30.32 Marine sciences.'

[58] 'Interdisciplinary mathematics computer and information sciences' includes '30.06 Systems science and theory' '30.08 Mathematics and computer science' and '30.30 Computational science.'

[59] Refers to whether a person aged 15 years and over was employed unemployed or not in the labour force during the week of Sunday May 1 to Saturday May 7 2016.

Early enumeration was conducted in remote isolated parts of the provinces and territories. When enumeration has taken place before May 2016 the reference date used is the date on which the household was enumerated.

In the past this variable was called 'labour force activity.'

[60] Class of worker refers to whether a person aged 15 years and over is an employee or is self-employed.

[61] Includes unemployed persons aged 15 years and over who have never worked for pay or in self-employment or who had last worked prior to January 1 2015.

[62] Includes the experienced labour force which refers to persons aged 15 years and over who during the week of Sunday May 1 to Saturday May 7 2016 were employed and the unemployed who had last worked for pay or in self-employment in either 2015 or 2016.

[63] Includes persons aged 15 years and over with or without an incorporated business with paid help or without paid help as well as unpaid family workers.

[64] Refers to the number of weeks in which a person worked for pay or in self-employment in 2015 at all jobs held even if only for a few hours and whether these weeks were mostly full time (30 hours or more per week) or mostly part time (less than 30 hours per week).

[65] Includes persons aged 15 years and over who never worked persons who worked prior to 2015 persons who worked in 2016 but not in 2015.

[66] Full time is 30 hours or more per week.

[67] Part time is less than 30 hours per week.

[68] Refers to the kind of work performed by persons aged 15 years and over as determined by their kind of work and the description of the main activities in their job. The occupation data are produced according to the NOC 2016.

[69] Includes unemployed persons aged 15 years and over who have never worked for pay or in self-employment or who had last worked prior to January 1 2015.

[70] Includes the experienced labour force which refers to persons aged 15 years and over who during the week of Sunday May 1 to Saturday May 7 2016 were employed and the unemployed who had last worked for pay or in self-employment in either 2015 or 2016.

[71] Refers to the general nature of the business carried out in the establishment where the person worked. The data are produced according to the NAICS 2012.

[72] Includes unemployed persons aged 15 years and over who have never worked for pay or in self-employment or who last worked prior to January 1 2015.

[73] Includes the experienced labour force which refers to persons aged 15 years and over who during the week of Sunday May 1 to Saturday May 7 2016 were employed and the unemployed who had last worked for pay or in self-employment in either 2015 or 2016.

[74] Classification of respondents according to whether they worked at home worked outside Canada had no fixed workplace address or worked at a specific address (usual place of work).

[75] The census assumes that the commute to work originates from the usual place of residence but this may not always be the case. Sometimes respondents may be on a business trip and may have reported their place of work or main mode of commuting based on where they were working during the trip. Some persons maintain a residence close to work and commute to their home on weekends. Students often work after school at a location near their school. As a result the data may show unusual commutes or unusual main modes of commuting.

[76] The sum of the languages in this table is greater than the total population count because a person may report more than one language in the census.

n.i.e. = not included elsewhere

n.o.s. = not otherwise specified

Refers to the language used at work as reported on May 10 2016 by the individuals aged 15 years and over who worked since January 1 2015.

[77] Total income - The sum of certain incomes (in cash and in some circumstances in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between:

*statistical units of social statistical programs such as persons private households census families and economic families

*statistical units of business statistical programs such as enterprises companies establishments and locations

*statistical units of farm statistical programs such as farm operator and farm family.

In the context of persons total income refers to receipts from certain sources before income taxes and deductions during a specified reference period.

In the context of census families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of economic families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of households total income refers to receipts from certain sources of all household members before income taxes and deductions during a specified reference period.

The monetary receipts included are those that tend to be of a regular and recurring nature. Receipts that are included as income are:

*employment income from wages salaries tips commissions and net income from self-employment (for both unincorporated farm and non-farm activities)

*income from investment sources such as dividends and interest on bonds accounts guaranteed investment certificates (GICs) and mutual funds

*income from employer and personal pension sources such as private pensions and payments from annuities and registered retirement income funds (RRIFs)

*other regular cash income such as child support payments received spousal support payments (alimony) received and scholarships

*income from government sources such as social assistance child benefits Employment Insurance benefits Old Age Security benefits Canada Pension Plan and Québec Pension Plan benefits and disability income.

Receipts excluded from this income definition are:

*one-time receipts such as lottery winnings gambling winnings cash inheritances lump-sum insurance settlements and tax-free savings account (TFSA) or registered retirement savings plan (RRSP) withdrawals

*capital gains because they are not by their nature regular and recurring. It is further assumed that they are more relevant to the concept of wealth than the concept of income

*employers' contributions to registered pension plans Canada Pension Plan Québec Pension Plan and Employment Insurance

*voluntary inter-household transfers imputed rent goods and services produced for barter and goods produced for own consumption.

After-tax income - Total income less income taxes of the statistical unit during a specified reference period. Income taxes refers to the sum of federal income taxes provincial and territorial income taxes less abatement where applicable. Provincial and territorial income taxes include health care premiums in certain jurisdictions. Abatement reduces the federal income taxes payable by persons residing in Quebec or in certain self-governing Yukon First Nation settlement lands.

Market income - The sum of employment income (wages salaries and commissions net self-employment income from farm or non-farm unincorporated business and/or professional practice) investment income private retirement income (retirement pensions superannuation and annuities including those from registered retirement savings plans [RRSPs] and registered retirement income funds [RRIFs]) and other money income from market sources during the reference period. It is equivalent to total income minus government transfers. It is also referred to as income before transfers and taxes.

Government transfers - All cash benefits received from federal provincial territorial or municipal governments during the reference period.

It includes:

*Old Age Security pension Guaranteed Income Supplement Allowance or Allowance for the Survivor

*retirement disability and survivor benefits from Canada Pension Plan and Québec Pension Plan

*benefits from Employment Insurance and Québec parental insurance plan

*child benefits from federal and provincial programs

*social assistance benefits

*workers' compensation benefits

*Working income tax benefit

*Goods and services tax credit and harmonized sales tax credit

*other income from government sources.

Employment income - All income received as wages salaries and commissions from paid employment and net self-employment income from farm or non-farm unincorporated business and/or professional practice during the reference period.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

Median income - The median income of a specified group is the amount that divides the income distribution of that group into two halves i.e. the incomes of half of the units in that group are below the median while those of the other half are above the median. Median incomes of individuals are calculated for those with income (positive or negative).

Average income - Average income of a specified group is calculated by dividing the aggregate income of that group by the number of units in that group. Average incomes of individuals are calculated for those with income (positive or negative).

[78] Employment income - All income received as wages salaries and commissions from paid employment and net self-employment income from farm or non-farm unincorporated business and/or professional practice during the reference period.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

[79] Full-year full-time workers - Persons aged 15 years and over who worked mostly full time (30 hours or more per week) and full year (49 weeks and over per year) in 2015. For more information see variable work activity in 2015 Dictionary Census of Population 2016.

[80] Median income - The median income of a specified group is the amount that divides the income distribution of that group into two halves i.e. the incomes of half of the units in that group are below the median while those of the other half are above the median.

Median incomes of individuals are calculated for those with income (positive or negative).

[81] Average income - Average income of a specified group is calculated by dividing the aggregate income of that group by the number of units in that group.

Average incomes of individuals are calculated for those with income (positive or negative).

[82] Composition of total income - The composition of the total income of a population group or a geographic area refers to the relative share of each income source or group of sources expressed as a percentage of the aggregate total income of that group or area.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

[83] Market income - The sum of employment income (wages salaries and commissions net self-employment income from farm or non-farm unincorporated business and/or professional practice) investment income private retirement income (retirement pensions superannuation and annuities including those from registered retirement savings plans [RRSPs] and registered retirement income funds [RRIFs]) and other money income from market sources during the reference period. It is equivalent to total income minus government transfers. It is also referred to as income before transfers and taxes.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

[84] Employment income - All income received as wages salaries and commissions from paid employment and net self-employment income from farm or non-farm unincorporated business and/or professional practice during the reference period.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

[85] Government transfers - All cash benefits received from federal provincial territorial or municipal governments during the reference period. It includes:

*Old Age Security pension Guaranteed Income Supplement Allowance or Allowance for the Survivor

*retirement disability and survivor benefits from Canada Pension Plan and Québec Pension Plan

* benefits from Employment Insurance and Québec parental insurance plan

*child benefits from federal and provincial programs

*social assistance benefits

*workers' compensation benefits

*Working income tax benefit

*Goods and services tax credit and harmonized sales tax credit

*other income from government sources.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

[86] Total income - The sum of certain incomes (in cash and in some circumstances in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between:

*statistical units of social statistical programs such as persons private households census families and economic families

*statistical units of business statistical programs such as enterprises companies establishments and locations

*statistical units of farm statistical programs such as farm operator and farm family.

In the context of persons total income refers to receipts from certain sources before income taxes and deductions during a specified reference period.

In the context of census families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of economic families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of households total income refers to receipts from certain sources of all household members before income taxes and deductions during a specified reference period.

The monetary receipts included are those that tend to be of a regular and recurring nature. Receipts that are included as income are:

- *employment income from wages salaries tips commissions and net income from self-employment (for both unincorporated farm and non-farm activities)
- *income from investment sources such as dividends and interest on bonds accounts guaranteed investment certificates (GICs) and mutual funds
- *income from employer and personal pension sources such as private pensions and payments from annuities and registered retirement income funds (RRIFs)
- *other regular cash income such as child support payments received spousal support payments (alimony) received and scholarships
- *income from government sources such as social assistance child benefits Employment Insurance benefits Old Age Security benefits Canada Pension Plan and Québec Pension Plan benefits and disability income.

Receipts excluded from this income definition are:

- *one-time receipts such as lottery winnings gambling winnings cash inheritances lump-sum insurance settlements and tax-free savings account (TFSA) or registered retirement savings plan (RRSP) withdrawals
- *capital gains because they are not by their nature regular and recurring. It is further assumed that they are more relevant to the concept of wealth than the concept of income
- *employers' contributions to registered pension plans Canada Pension Plan Québec Pension Plan and Employment Insurance
- *voluntary inter-household transfers imputed rent goods and services produced for barter and goods produced for own consumption.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

[87] After-tax income - After-tax income refers to total income less income taxes of the statistical unit during a specified reference period. Income taxes refers to the sum of federal income taxes provincial and territorial income taxes less abatement where applicable. Provincial and territorial income taxes include health care premiums in certain jurisdictions. Abatement reduces the federal income taxes payable by persons residing in Quebec or in certain self-governing Yukon First Nation settlement lands.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

[88] Employment income - All income received as wages salaries and commissions from paid employment and net self-employment income from farm or non-farm unincorporated business and/or professional practice during the reference period.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

[89] Total income - The sum of certain incomes (in cash and in some circumstances in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between:

- *statistical units of social statistical programs such as persons private households census families and economic families
- *statistical units of business statistical programs such as enterprises companies establishments and locations
- *statistical units of farm statistical programs such as farm operator and farm family.

In the context of persons total income refers to receipts from certain sources before income taxes and deductions during a specified reference period.

In the context of census families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of economic families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of households total income refers to receipts from certain sources of all household members before income taxes and deductions during a specified reference period.

The monetary receipts included are those that tend to be of a regular and recurring nature. Receipts that are included as income are:

- *employment income from wages salaries tips commissions and net income from self-employment (for both unincorporated farm and non-farm activities)
- *income from investment sources such as dividends and interest on bonds accounts guaranteed investment certificates (GICs) and mutual funds
- *income from investment sources such as dividends and interest on bonds accounts guaranteed investment certificates (GICs) and mutual funds
- *income from employer and personal pension sources such as private pensions and payments from annuities and registered retirement income funds (RRIFs)
- *other regular cash income such as child support payments received spousal support payments (alimony) received and scholarships
- *income from government sources such as social assistance child benefits Employment Insurance benefits Old Age Security benefits Canada Pension Plan and Québec Pension Plan benefits and disability income.

Receipts excluded from this income definition are:

- *one-time receipts such as lottery winnings gambling winnings cash inheritances lump-sum insurance settlements and tax-free savings account (TFSA) or registered retirement savings plan (RRSP) withdrawals
- *capital gains because they are not by their nature regular and recurring. It is further assumed that they are more relevant to the concept of wealth than the concept of income
- *employers' contributions to registered pension plans Canada Pension Plan Québec Pension Plan and Employment Insurance
- *voluntary inter-household transfers imputed rent goods and services produced for barter and goods produced for own consumption.

After-tax income - Total income less income taxes of the statistical unit during a specified reference period. Income taxes refers to the sum of federal income taxes provincial and territorial income taxes less abatement where applicable. Provincial and territorial income taxes include health care premiums in certain jurisdictions. Abatement reduces the federal income taxes payable by persons residing in Quebec or in certain self-governing Yukon First Nation settlement lands.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

Median income - The median income of a specified group is the amount that divides the income distribution of that group into two halves i.e. the incomes of half of the units in that group are below the median while those of the other half are above the median. Median incomes of families are calculated for all units whether or not they had income.

Average income - The average income of a specified group is calculated by dividing the aggregate income of that group by the number of units in that group. Average incomes of families are calculated for all units whether or not they had income.

Economic family structure - The combination of relatives that comprise a family. Classification on this variable considers the presence or absence of: married spouses or common-law partners

[90] Total income - The sum of certain incomes (in cash and in some circumstances in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between:

- *statistical units of social statistical programs such as persons private households census families and economic families
- *statistical units of business statistical programs such as enterprises companies establishments and locations

*statistical units of farm statistical programs such as farm operator and farm family.

In the context of persons total income refers to receipts from certain sources before income taxes and deductions during a specified reference period.

In the context of census families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of economic families total income refers to receipts from certain sources of all of its family members before income taxes and deductions during a specified reference period.

In the context of households total income refers to receipts from certain sources of all household members before income taxes and deductions during a specified reference period.

The monetary receipts included are those that tend to be of a regular and recurring nature. Receipts that are included as income are:

*employment income from wages salaries tips commissions and net income from self-employment (for both unincorporated farm and non-farm activities)

*income from investment sources such as dividends and interest on bonds accounts guaranteed investment certificates (GICs) and mutual funds

*income from employer and personal pension sources such as private pensions and payments from annuities and registered retirement income funds (RRIFs)

*other regular cash income such as child support payments received spousal support payments (alimony) received and scholarships

*income from government sources such as social assistance child benefits Employment Insurance benefits Old Age Security benefits Canada Pension Plan and Québec Pension Plan benefits and disability income.

Receipts excluded from this income definition are:

*one-time receipts such as lottery winnings gambling winnings cash inheritances lump-sum insurance settlements and tax-free savings account (TFSA) or registered retirement savings plan (RRSP) withdrawals

*capital gains because they are not by their nature regular and recurring. It is further assumed that they are more relevant to the concept of wealth than the concept of income

*employers' contributions to registered pension plans Canada Pension Plan Québec Pension Plan and Employment Insurance

*voluntary inter-household transfers imputed rent goods and services produced for barter and goods produced for own consumption.

After-tax income - Total income less income taxes of the statistical unit during a specified reference period. Income taxes refers to the sum of federal income taxes provincial and territorial income taxes less abatement where applicable. Provincial and territorial income taxes include health care premiums in certain jurisdictions. Abatement reduces the federal income taxes payable by persons residing in Quebec or in certain self-governing Yukon First Nation settlement lands.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

Median income - The median income of a specified group is the amount that divides the income distribution of that group into two halves i.e. the incomes of half of the units in that group are below the median while those of the other half are above the median. Median incomes of persons not in families are calculated for all units whether or not they had income.

Average income - Average income of a specified group is calculated by dividing the aggregate income of that group by the number of units in that group. Average incomes of persons not in families are calculated for all units whether or not they had income.

[91] Calculation includes persons not in economic families without income (with an income of zero).

[92] Calculation includes persons not in economic families without income (with an income of zero).

[93] Calculation includes persons not in economic families without income (with an income of zero).

[94] Calculation includes persons not in economic families without income (with an income of zero).

[95] Economic family after-tax income decile group - The economic family income decile group provides a rough ranking of the economic situation of a person based on his or her relative position in the Canadian distribution of the adjusted after-tax income of economic families for all persons in private households.

Using data from the 2016 Census of Population the population in private households is sorted according to its adjusted after-tax family income and then divided into 10 equal groups each containing 10% of the population. The decile cut-points are the levels of adjusted after-tax family income that define the 10 groups.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

[96] Low-income status - The income situation of the statistical unit in relation to a specific low-income line in a reference year. Statistical units with income that is below the low-income line are considered to be in low income.

For the 2016 Census the reference period is the calendar year 2015 for all income variables.

The low-income concepts are not applied in the territories and in certain areas based on census subdivision type (such as Indian reserves). The existence of substantial in-kind transfers (such as subsidized housing and First Nations band housing) and sizeable barter economies or consumption from own production (such as product from hunting farming or fishing) could make the interpretation of low-income statistics more difficult in these situations.

Low-income measure after tax (LIM-AT) - The Low-income measure after tax refers to a fixed percentage (50%) of median-adjusted after-tax income of private households. The household after-tax income is adjusted by an equivalence scale to take economies of scale into account. This adjustment for different household sizes reflects the fact that a household's needs increase but at a decreasing rate as the number of members increases.

Using data from the 2016 Census of Population the line applicable to a household is defined as half the Canadian median of the adjusted household after-tax income multiplied by the square root of household size. The median is determined based on all persons in private households where low-income concepts are applicable. Thresholds for specific household sizes are presented in Table 4.2 Low-income measures thresholds (LIM-AT and LIM-BT) for private households of Canada 2015 Dictionary Census of Population 2016.

When the unadjusted after-tax income of household pertaining to a person falls below the threshold applicable to the person based on household size the person is considered to be in low income according to LIM-AT. Since the LIM-AT threshold and household income are unique within each household low-income status based on LIM-AT can also be reported for households.

Low-income cut-offs after tax (LICO-AT) - The Low-income cut-offs after tax refers to an income threshold defined using 1992 expenditure data below which economic families or persons not in economic families would likely have devoted a larger share of their after-tax income than average to the necessities of food shelter and clothing. More specifically the thresholds represented income levels at which these families or persons were expected to spend 20 percentage points or more of their after-tax income than average on food shelter and clothing. These thresholds have been adjusted to current dollars using the all-items Consumer Price Index (CPI).

The LICO-AT has 35 cut-offs varying by seven family sizes and five different sizes of area of residence to account for economies of scale and potential differences in cost of living in communities of different sizes. These thresholds are presented in Table 4.3 Low-income cut-offs after tax (LICO-AT - 1992 base) for economic families and persons not in economic families 2015 Dictionary Census of Population 2016.

When the after-tax income of an economic family member or a person not in an economic family falls below the threshold applicable to the person the person is considered to be in low income according to LICO-AT. Since the LICO-AT threshold and family income are unique within each economic family low-income status based on LICO-AT can also be reported for economic families.

Prevalence of low income - The proportion or percentage of units whose income falls below a specified low-income line.

Data quality:

Nunavik [Inuit region]

Global non-response rate (GNR) long-form census questionnaire: 13.4%

Data quality index showing a long-form income non-response rate higher than or equal to 10% but lower than 20%.
